Celebrating our  
91<sup>st</sup> Year

## LITTLE BIT ABOUT US

1<sup>st</sup> Generation

2<sup>nd</sup> Generation

3<sup>rd</sup> Generation

4<sup>th</sup> Generation

**rocks 'n' roots**  
is one of Michigan's largest and oldest  
landscape hardgood and pond supply centers.

In 1918 when Patriarch August Zendt arrived from Switzerland, speaking almost no English, he had a dream of starting a landscape company, and in 1928 he began to fulfill that dream with one small pickup truck. As each of his three sons graduated from MSU with Horticultural degrees, they joined him and built one of Michigan's most prestigious landscape construction and maintenance companies, Zendt's Landscaping, which, during its run, won many regional and national awards.

From their experience in the construction and maintenance areas, in 1994, Jack and Barbara Zendt saw the need for a supply yard that would provide a wide range of landscape hardgoods, sprinkler, lighting and pond materials. Their idea was to offer quick and efficient service for the contractor, in an inviting and informative atmosphere friendly enough for homeowners too---and, **rocks 'n' roots** was born.

Today, **rocks 'n' roots** is a fourth-generation, family owned and operated company, with over 170 combined years of hands-on experience. Several of its employees transitioned from Zendt's Landscaping and have been with **rocks 'n' roots** from its inception. Located on Van Dyke just south of 29 Mile, it is in an area of amazing growth and very convenient to the Van Dyke Expressway.

The first thing a customer will notice outside at **rocks 'n' roots** is the vast selection. Everything is on display, and much of it is showcased in beautiful paver and flagstone walkways, ponds, waterfalls, bubbling rocks, decorative retaining walls and beds of stone and mulch. With over 40 types of decorative stone, 20 mulches ( bulk and bagged ) , topsoil, sand, natural walls, flag and outcropping, to pavers and walls from the most trusted and well-known companies including Belgard, Fendt, Oaks, Rosetta and Unilock, the displays are impressive. Inside the store are veneer samples, water features, pumps, pond kits, chemicals, and transformers, low-voltage lights with a great new displays, sprinkler parts, tools, fittings and so much more-- **rocks 'n' roots** has it all. This year additional outdoor displays have been added, from a mobile display trailer with samples and videos, to outdoor kitchens, pizza ovens and fire ring kits!

**rocks 'n' roots** is constantly evolving its inventory to better service its clientele. If there is something they do not carry that a customer needs they will try to find it, and if it is something that a customer uses often, they will stock it. The sales staff always greets customers with a smile and makes them right at ease, happy to help them with their project, large or small. Additionally, there are free seminars on Saturdays during season, held indoors, rain or shine. Check its informative web site for times, product information and ideas.

**If August Zendt was here today, he would be extremely proud!**

## DOWNSPOUT RUNOFF

Piping attaches easily to downspouts to carry water away from the house and prevent wet basement walls and standing water near the home. Use a downspout adaptor, snap non-perforated tubing into the adaptor and carry it down to a disposal area.

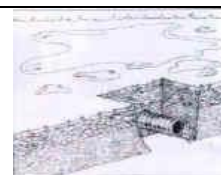

## WINDOW WELLS

Piping is ideal for draining window wells to prevent water from running down foundation walls. To install a drainage system, insert a perforated end cap into the well, attach an elbow fitting, and use non-perforated tubing to carry water away from the well.

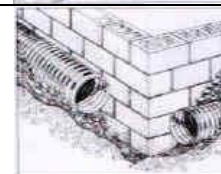

## LOW SPOTS

Perforated tubing installed under low areas and run to a drainage outlet will prevent standing water on your lawn.

## FOUNDATION DRAINS

Perforated tubing installed against the foundation will carry water away from basement walls preventing dampness and leakage. Run perforated tubing around entire foundation, using elbows for tight corner fittings, to a storm drain/catch basin.
