Elements

“Elements are pre-built modular units that are manufactured with Belgard product by Harmony Outdoor Living, Inc. They are designed to flow seamlessly with the surrounding hardscape. Each module comes with fork slots that allow them to be installed with skid steers, forklifts, or even cranes. They are available in three main collections: Bristol, Wexford, and Nottingham. They are also available in two fireplace series: Euro and Brighton. Outdoor Kitchens are also available in endless configurations. In addition to these we also have Wall Insets and Lighting Options by FX”

Please note the following when placing an order:

- ***Please list the product ID/SKU***
- ***Choose a standard color scheme (or contact us for a 3D image of a custom color combination)***
- ***“Custom colors & accents” are available - call for information***
- ***Make sure to check the weights and plan to have the appropriate machine available***
- ***List any additional features/ upgrades, for example : lighting, accent changes, accessories, etc.***

Installation Instructions

Installation

"Elements are very easy to install. Here are a couple cross section details to consider. Keep in mind, these ARE NOT engineered plans. Make sure you check with your local municipality for their requirements when installing Elements. Here are a few other key points to remember:

- *Always place a piece of material (plywood or carpet work well) between your forks and the Element to prevent chipping*
- *Always transport the Element on the pallet it comes with until you are ready to place on the permanent location*
- *Make sure to use a ratchet strap to secure the Element to the loader when placing*
- *Handle Elements with care – they are concrete but not indestructible*
- *Make sure to size the machine to the Elements weight*
- *All Elements are designed to be buried 4" below finish grade (note – bars need to be buried 8" below finish grade)*

Typical Cross Section for Concrete Pad Installation

**** The following measurements are a suggestion. Always check your local building codes before installing.**

Trailer Layout Guide

Load 1

lbs

1	3	5	7	9	11	13	15
2	4	6	8	10	12	14	16

Load 2

lbs

Brick Oven Base	Brick Oven Top	12" Pair Water Feature	24" Water Feature	Fire Pit	Fire Table	1	3
					Hearth	2	4

Load 1

Load 1 shows a layout for the number of Elements that can be loaded on a typical 48 ft trailer. We start with 16 and break it down by weight from there. For Bristol and Wexford we can only get 7 fireplaces on so we only use 14 slots. For the Brighton fireplace we can use all 16 so we get 8 fireplaces on.

* Make sure the truck can haul 48,000lbs when taking 7 fireplaces.

Load 2

Load 2 shows the items that will take up 2 slots because of there size. It also shows how we sometimes will stack the hearths on a load.

The best thing to do is follow this guide and then we will make a minor adjustment on a piece or two once we receive the order. We now send out a sheet like this after we receive a PO so you can see how much room is being used on a trailer. Any questions please let me know.
