

2012 Unilock Product Guide

Creation Begins With The Elements.™

HARMONY
OUTDOOR LIVING INC.

UNILOCK®

Elements

“Elements are pre-built modular units that are manufactured with Unilock product by Harmony Outdoor Living, Inc. They are designed to flow seamlessly with the surrounding hardscape. Each module comes with fork slots that allow them to be installed with skid steers, forklifts, or even cranes.

Please note the following when placing an order:

- *Please list the product ID/SKU*
- *Choose a standard color scheme (or contact us for a 3D image of a custom color combination)*
- *“Custom colors & accents” are available - call for information*
- *Make sure to check the weights and plan to have the appropriate machine available*
- *List any additional features/ upgrades, for example : lighting, accent changes, accessories, etc.*

Low Voltage Lighting Upgrades

“Low Voltage Lighting fixtures from FX are available as upgrades. The fixtures come in standard as Bronze, please contact us directly for additional colors. We offer the following models : BelloPerimetro (lip light) and RotondoLuna (for brick ovens). Below are lighting diagrams of possible lighting locations. Be sure to specify which model, color, and location you prefer. Note, each light comes with enough wire to protrude from the back of the Element. They DO NOT include any connectors or transformers.”

Fireplace Units

Possible locations shown :

7

Brick Oven

Possible locations shown :

2

Grill Island

Possible locations shown :

2

NOTE : Must specify location & number of lights when ordering.

Installation Instructions

Installation

“Elements are very easy to install. Here are a couple cross section details to consider. Keep in mind, these ARE NOT engineered plans. Make sure you check with your local municipality for their requirements when installing Elements. Here are a few other key points to remember:

- *Always place a piece of material (plywood or carpet work well) between your forks and the Element to prevent chipping*
- *Always transport the Element on the pallet it comes with until you are ready to place on the permanent location*
- *Make sure to use a ratchet strap to secure the Element to the loader when placing*
- *Handle Elements with care – they are concrete but not indestructible*
- *Make sure to size the machine to the Elements weight*
- *All Elements are designed to be buried 4” below finish grade (note – bars need to be buried 8” below finish grade)*

Typical Cross Section for Concrete Pad Installation

**** The following measurements are a suggestion. Always check your local building codes before installing.**
