President's Message

Famed architect Louis Kahn once said; *"Even a brick wants to be something... It aspires... wants to be something more than it is; something better than it is, and that is what we must be."*

I'm proud to say we build on dreams.

As an integrated masonry and landscape products provider, we are the ONE Trusted Source for quality, durability and long-lasting style. It's this trust, placed in us by our customers, that keeps us focused on our goal; to lead the way in innovation, affordability and lifetime satisfaction.

The theme of this year's catalogue "Feel the Difference" is a fitting phrase to describe our company's mission. We are devoted to engineering masonry and landscaping materials that stimulate an instant response, so when you see driveways, homes, commercial buildings, or backyard landscaping projects, you know they were constructed with products from Brampton Brick.

When you purchase Oaks Concrete Products (a division of Brampton Brick Limited), you make an investment in longevity, in stunning aesthetics and in us. We take that investment seriously, aspiring to be the industry leader, meeting the needs of clients and staying ahead of market trends. We are motivated to strive to do more, to do better. From our state of the art production facilities, to quality control, distribution and customer service, we ensure our products are made to last while exceeding our customers' dreams.

Brampton Brick is always moving forward, striving to develop innovative products with technology, aesthetics and the environment in mind. With products such as Hydr'eau Pave and Enviro Pave, we have created permeable pavers that offer modern solutions to storm water challenges. Rainfall passes through the pavers to recharge the groundwater or be recycled through municipal sewer systems, building in sustainability. Staying at the forefront of design, Elegante clay bricks are a one of a kind product that offers the look of stone with the ease and durability of brick, while Vivace concrete masonry products beautifully harmonize with Oaks pavers and wall products.

As an involved corporate citizen, Brampton Brick invests in people by contributing to local economies, providing employment opportunities and working with local suppliers, and providing donations to local charities and associations. Our strength comes from our relationships with people, now and always.

Thank you.
Jeffrey G. Kerbel
President and CEO
Brampton Brick Limited

Oaks Concrete Products Lifetime Warranty

Oaks Concrete Products are manufactured to the highest quality standards in a tightly controlled, fully monitored production environment. Oaks Concrete Products are guaranteed to be free of material defects for as long as the original Purchaser (Homeowner), owns the residence where the product(s) are installed. Product found to be defective will be replaced without cost. Colour matching cannot be guaranteed and replacement labour is not included. The warranty is subject to normal 'residential' use conditions.

Limitations & Exclusions

This Warranty does not apply to damage, deterioration or colour change to the concrete products resulting from:

1. Improper installation procedures inconsistent with the Interlocking Concrete Paving Institute (ICPI) installation methodology and guidelines.
2. Breakage caused from overloading, impact or sub-grade settlement.
3. Discolouration caused by staining, improper sealing, pollution or abrasion.
4. Use of de-icing chemicals other than sodium chloride.
5. Efflorescence – this is not a material defect.

P A V E R S

Transforming any outdoor living space and bringing it to life with luxury, superior style and comfort; that's what Oaks Paving Stones do best. A myriad of colour and texture choices, sizes and design options allow for unlimited originality, reflecting your personal style with unparalleled appeal. You have only to dream it and Oaks Paving Stones will make your project the reality you will cherish for a lifetime.

PRESIDIO new

Clean lines and stylish allure; that's what Presidio paving stones bring to any design project. With subtle chamfered edges, random lengths and two widths, these **80mm (3.15")** thick linear paving stones are suitable for light to moderate vehicular and pedestrian usage. Reduced joint spacing complies with wheelchair access specifications and a choice of appealing colours offer endless design options.

VILLANOVA

A natural stone look, with accentuated contours that define Villanova's unique characteristics. This large scale paver has an **80mm (3.15")** thickness suitable for both vehicle and pedestrian traffic. Villanova's three piece paving system allows a natural stone look with ranges of earth tones that emphasize any landscape décor. Design flexibility is endless with Villanova's 8x16, 16x16 and 24x16 sizes. Give your project an upscale look using the fifteen different textures of the 8x16 rectangle in the timeless herringbone pattern or enhance the scale by adding the square and large rectangle units.

ENVIRO PRODUCTS

Quality products that work in harmony with nature are what Oaks Enviro Products are all about. Ecologically engineered, these classically attractive permeable pavers effectively prevent erosion and conform to municipal storm water regulations. By allowing water to pass through and escape to a special pavement base, water can then be stored or drain into the soil to recharge the groundwater. Oaks Enviro pavers make puddles a thing of the past by reducing excessive rainfall runoff and eliminating sediment build-up. Oaks Enviro Products come in styles that offer limitless design options.

OAKS PERMEABLE PAVEMENT SYSTEMS

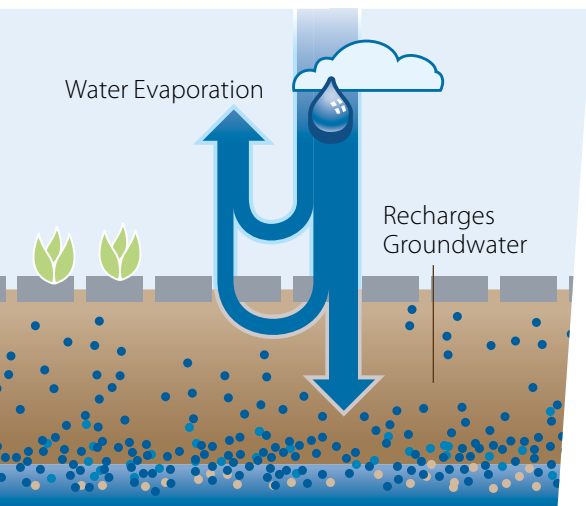

Imagine no more puddles, no more sloping pavements towards drains and no more burden placed on existing over-taxed stormwater systems reducing the potential for flooding. Oaks permeable products are uniquely designed pavers that allow storm water to pass through the pavement surface into a special pavement base that allows water to be stored or drain into the natural soil to recharge groundwater - just like nature intended. We can all do our part to manage stormwater and improve the environment by installing permeable pavers in our home.

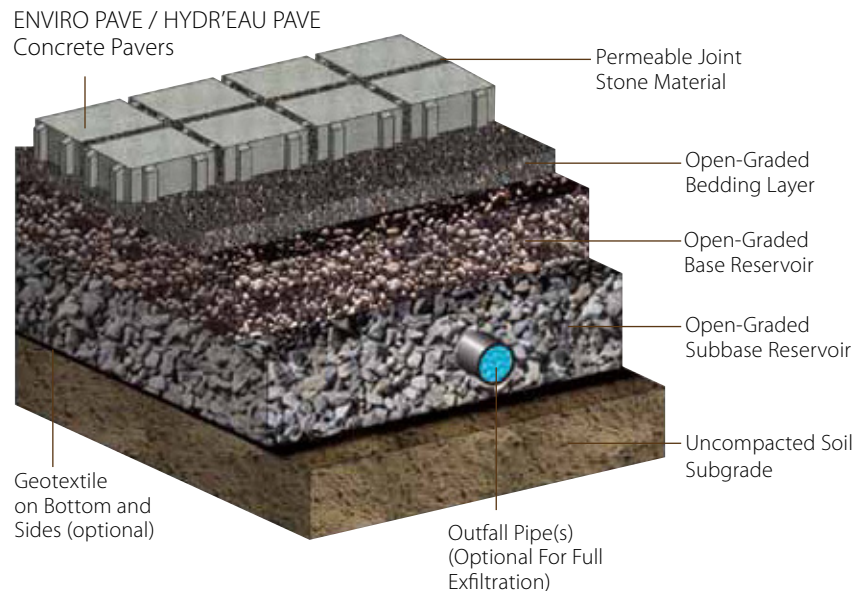

Benefits:

- Eliminates surface water runoff
- Captures peak flow rainfall events and provides contaminant filtration on first flush
- Recharges groundwater through the paver joint and base structure aggregates
- Reduces erosion and sediment build-up by undesirable runoff, promoting stream and lake health
- Filters surface water removing pollutants via clear, crushed aggregate used in joint spaces and base layer structures
- Compliant with most levels of government for Best Management Practices (BMP's) regarding stormwater management regulations

Wherever your design dreams take you, Oaks can boost your project to a whole new level. Our versatile product packaging lends itself to any application your creative genius inspires.

Custom designs, specialty pavers, linear banding and even soldier coursing offer unlimited project variations to create a look that is uniquely your own.

Textures

Smooth

The even surface of the smooth texture is attractive and gentle to the touch, but retains the stain and slip-resistant properties you expect.

Tumbled

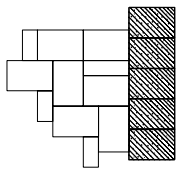

The tumbled finish offers the weathered look without compromising durability or material consistency.

Natural

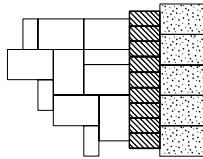

Added visual appeal and a more natural texture make this a popular choice for pavers, walls and borders.

Soldier Course (or Banding)

Example A: Single size pavers (usually a rectangle) differing colour, same texture.

Example B: Two or more bands of single size pavers with differing size, colour and texture from 1 band to another.

W A L L S

When it comes to building on quality, superior aesthetics and durability, Oaks Wall products offer an architectural edge. Unparalleled beauty and functionality complement a variety of landscape projects, elevating any design with the marriage of both strength and splendour. Oak walls radiate warmth and charm, offering a classic refinement and putting your project in a class all its own.

FIELDSTONE

With its rough cut appearance and solid construction, Oaks Fieldstone products bring to life creative features such as garden walls, planters, steps or entrance pillars in either random or structured patterns. Rugged Fieldstone heightens the look of any design and its built-in rear retention lip allows for greater sustainability. Tumbled units are pre-split, available in both 90mm (3.54") and 135mm (5.31") heights.

Use units as a single stone height wall or combine (90/135mm) together for simple, cost effective construction options.

ORTANA PLUS

Building on the appeal and ease of Ortana, Oaks
Ortana Plus wall blocks offer a more vintage,
weathered option. Available in a pleasing palette of
subtle earth tones, Ortana Plus complements any
design project. With a rear tongue removal feature,
these blocks allow for a consistent appearance in
both vertical walls and corner units. Ortana Plus
can be easily converted for designs that feature
double-sided walls, seat walls and driveway
borders. This durable product offers limitless
applications as timeless as they are appealing.

ALTERRA

Form and function merge into one with Oaks Alterra wall stones. When large scale projects demand a steadfast product that is both attractive and reliable, Alterra is the perfect match. Its split-face wall system allows for either vertical or set back installations, for most typical gravity wall construction to 6' (1829mm) or to 10' (3048mm) with the extended unit. Engineer for higher height requirements, typical 40' (12,192mm), with grid reinforced stabilization.

Standard Unit

Width 1000 mm (39.37 in.)
Height 185 mm (7.28 in.)
Depth 500 mm (19.69 in.)

Coping Unit

Width 1000 mm (39.37 in.)

GET THE JOB DONE

Build, Join, Fasten, Clean & Seal

Oaks provides you with all the materials needed for your landscaping endeavors. With our full line of accessory products, we provide you with all the trusted components your project may require.

Oaks Sealants

The Oaks sealant line includes sealers to meet any aesthetic need while providing superior surface protection - preventing water, dirt and stains from penetrating. From water based invisible sealers to wet look high gloss sealers, Oaks has the right sealer to complete any project.

All Sealers available in 3.78 litre / 1 gallon and 18.9 litre / 5 gallon container sizes.

Oaks Polymeric Sand

Oaks Polysands are designed to bind firmly and easily together in paver joints, allowing it to harden upon wetting. Oaks Polysand adds stability, performance, and lasting durability to your landscape projects. Ideal for pool areas, sloped surfaces, and replacing existing joints, Oaks Polysand resists all weather conditions, inhibits weed growth & ant colonization and gives you the assurance that your project will last the test of time.

Available in both Grey and Tan

Oaks Cleaners

Efflorescence cleaner is an acidic based cleaner specifically designed to remove efflorescence, laitance and accumulated dirt deposits evenly without discolouring the paver surfaces.

Grease & Grime Remover is a readily biodegradable, yet a powerful degreaser, capable of removing the toughest stains from grease, oil and organic deposits on concrete pavers.

Gum, Paint & Tar Stripper is a powerful stripper capable of removing chewing gum, tar, rubber, wax and tire marks from concrete pavers. Also a great paint and sealant remover that slowly dissolves and emulsifies, allowing easy removal with a jet of water.

GOOD FOR THE ENVIRONMENT, GOOD FOR YOUR JOINTS!

Available in
Granite and
Natural

Made with:

Organic-lock™
The self-healing organic binder

Organic-Lock is the patent pending Plant formula that supplies an elevated pH to its overall system. The resulting high pH prevents seeds from germinating, making for an unfavourable growing medium for nuisance weeds.

For paver joints: 0-9.5mm (0-3/8")

For larger joints: 9.5-50mm (3/8-2")

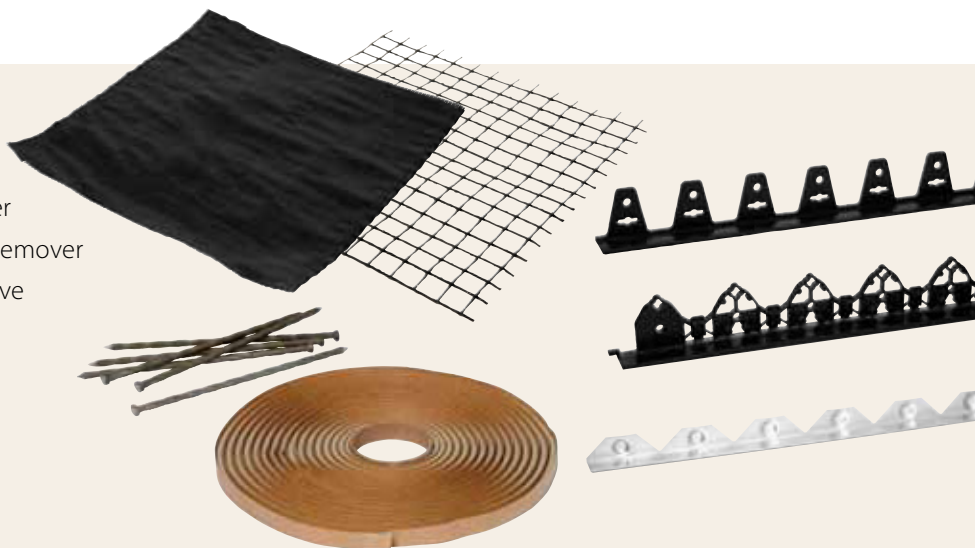

EnviroSAND^{plus} is a blend of Joint Sand and a swellable gum derived directly from a ground plant. This Biological bond is designed to resist erosion, while remaining completely flexible due to its SELF-HEALING Nature. The Organic Glue has been designed with an elevated pH system to prevent rapid biodegradation as well as preventing weed growth.

EnviroSTONE^{plus} is Scientifically designed to resist erosion, while remaining completely flexible due to its self-healing Organic Glue. Greater integral strength is provided by the larger particle sized pieces of the crushed Stone aggregate.

Also available:

- Butyl tape
- Steel Spikes
- Grids
- Filter Cloths
- Edge Restraints
- Rust Remover
- Dirt & Grease Cleaner
- Rollers
- Sealants
- Efflorescence Cleaner
- Paint, Tar & Rubber Remover
- Polyurethane adhesive
- Water Repellent
